Expertise: HTML5 | CSS3 | JavaScript | ES6 | React | Bootstrap | React Bootstrap | Tailwind | Daisy UI

Comfortable: Firebase | Node JS | Express JS | MongoDB | CRUD

Familiar: Material UI | TypeScript | Next JS | Redux | Stripe

Tools: Visual Studio Code | Netlify | Figma | Vercel

MY PROJECTS

Used Resale Products -   **Client-side code | Server-side code | Live Website**

It is a Full stack website for used electronics product resale purposes. User can easily order their suitable product. All products are a unique design and authentic. You can trust this website.

- When a user wants to log in they can select which role they want to visit for a better experience.
- There is a dashboard which is dynamically changes when a buyer/seller/admin login.
- An admin can delete any buyer or seller. Admin can verify the seller with a blue tick.

Technology used: React Router, Firebase, Vercel, JWT, React Query, CRUD, MongoDB, Tailwind.

SAM Kitchen - **Client-side code | Server-side code | Live Website**

This is a full-stack website. Beautifully handled responsiveness. Users can get fresh and homemade and also hygienic food at the door point. Cash on delivery method is also applicable.

- User can give their suggestion about the food quality and SAM Kitchen services if they want.
- Users can easily register and log in. Email Password & google authentication is implemented.
- Implement JWT token for verifying real users. No one can not access it without a real identity.

Technology used: React Router, Firebase, Vercel, JWT, CRUD, Google authentication. React toast

Expert Programmer - **Client-side code | Server-side code | Live Website**

It is a full-stack website to learn programming languages. Users can see the specific language and their details. All section is divided by full summary in depth. A lot of information can help users.

- Elegant design and responsiveness is the top priority of this website for a better user experience.
- Implement firebase authentication for email, and password login. React toast used to alert users.
- Server-side deployment in vercel. Client-side in firebase. All information comes from DB.

Technology used: React Router, React icons, React bootstrap, Firebase, CRUD, Vercel.
